Professional Summary: Detail-oriented Java Backend Developer with strong understanding of OOP concepts, Spring Boot, Hibernate/JPA, RESTful services, Microservices, and containerization. Skilled in database development using Oracle/MySQL and passionate about building efficient and scalable backend systems. Dedicated to continuous learning and applying modern Java technologies in real-world projects.

Technical Skills:

- **Databases:** Oracle, MySQL.
- **Core Java:** OOPs, Collections, Multithreading, Exception Handling, Streams, Lambda Expressions
- **Frameworks:** Spring Boot, Spring MVC, Hibernate/JPA, Microservices, RESTful APIs
- **DevOps & Containerization:** Docker, Kubernetes
- **Build & Tools:** Maven, IntelliJ IDEA, Postman, Git/GitHub
- **Frontend:** HTML, CSS(Basic)

Soft Skills:

- Strong problem-solving skills.
- Excellent English proficiency.
- Effective team player with good coordination skills.
- Adaptable to new environments, cultures, and work settings.

Education:

- **B.E. (Information Technology)** – Smt. Radhikatai Pandav College of Engineering, Nagpur (2021) – 7.91 CGPA
- **HSC** – Hislop College, Nagpur (2007) – 51.67%
- **SSC** – Modern School(CBSE), Nagpur (2005) – 68.8%

Academic Project:

Server Intrusion Protection System: Most security solutions focus on operating systems and applications, often leaving servers exposed to threats. The Server Intrusion Protection System (SIPS) fills this gap by conducting comprehensive security checks for different threat types. It dynamically evaluates actions based on predefined internal rules and permissions, ensuring that server remain secure and resilient against potential attacks.
